# SUBJECT INDEX

Acetaldehyde formation, in submerged cultures of *Saccharomyces*, 316
Acetic acid, rate of production of, in rumen of lactating cows, 554
Acetic fermentation, laboratory method for submerged, 425
Acidic carbonyl compounds, formation of, by lactic acid bacteria, 184
Actinomycetes, thermophilic, cultivation of, 394
Actinomycins, 263
Actinospectacin, in vitro activity of, in human whole blood, 524
Aeration, laboratory, theoretical basis for, 25
*Aerobacter aerogenes*, production of 2,3-butylene glycol by, in citrus wastes, 244
*Aeromonas liquefaciens*, identification of, in diseased fish, 587
Aerosols, bacterial, physical tracers for, 248
Algicide, use of Armazide as, 572
Alkanes, oxidation of hydrocarbons by nocardia during growth on, 383
Alkyl-substituted cyclic hydrocarbons, oxidation by nocardia grown on *n*-alkanes, 383
Amine salts of carboxylic acid, antimicrobial activity of, 475
α-Aminoadipic acid in yeast, biosynthesis of lysine from, 1
Antibiotic fermentation units, theoretical design of, 361
Antibiotic sensitivity discs, effect of paper on performance assay, 334
Antifungal agents, mixtures of quarternary ammonium compounds and long-chain fatty acids used as, 538
Antimicrobial activity of amine salts of carboxylic acids, 475
Antimicrobial activity, of gaseous agents, comparative procedure for evaluating, 45
Antiviral compounds, plaque suppression method for study of, 66
Armazide, algicidal and sanitizing properties of, 572
Arizona cultures, lysine-iron agar for detection of, 478
*Aspergillus niger* spores, electrophoretic properties of, 113
*Aspergillus oryzae*, effect of irradiation on, 10, 110
Auto-fluorescence, in microscopic organisms, 354
Auxotrophic mutants of *Escherichia coli*, production of L-threonine by, 419

Bacteria, survival of, effect of relative humidity on, 567
Bacteria, survival of, in frozen meat pies after baking, 6
Bacterial counts, of prepared frozen foods, influence of subtle differences in plating procedures, 32
Bacterial species, from rumen, which produce ammonia from protein hydrolyzate, 175
Bactericidal agents, in-use testing of, in hospitals, 167
Bacteriophage, T-3, slit sampler for collecting, 103
Bacteriophage-lysing strain of *Staphylococcus* used in manufacture of dry sausage, 480
Biosynthesis of lysine from acids in yeasts, 1
Bloat-provoking ration, effect of, on flora and fauna of rumen, 511
Blood, human whole, in vitro activity of actinospectacin in, 524
2,3-Butylene glycol production by *Aerobacter aerogenes* from citrus wastes, 244
Butyric acid, rate of production of, in rumen of lactating cows, 554

Cacao fermentation, yeasts isolated during, 370
*Candida krusei* and chlortetracycline effect on embryonated eggs, 52
*Candida utilis*, production of extracellular and total invertase by, 291
Canned food spoilage bacteria, effect of tylosin and nisin on, 108
Carboxylic acid, antimicrobial activity of amine salts of, 475
Catheters, rectal thermocouple, disinfection techniques for, and effects on, 273
Characterization of streptomycetes, an evaluation of criteria and procedures for, 55
Chicken, packaged, production of fluorescence on, 549
Chloramphenicol-resistant salmonellae, isolated in 1959 and 1960, 389
Chlorogenicase, microbiological production of, 205
Chlortetracycline and *Candida krusei* effect on embryonated eggs, 52
Chlortetracycline-treated and nontreated poultry, comparative microflora of, with special reference to public health aspects, 39
*Chromobacterium*, violet pigment-producing, in spoilage bacterium of refrigerated milk, 287
*Clostridium perfringens* (*welchii*) isolated from market poultry, 337
Coagulase-positive staphylococci, isolated from raw milk, 195
Coagulase-positive staphylococci, in market meats, 228
Coal, oxidation of pyritic materials of, 491
Collagen sutures, regenerated, sterilization with β-propiolactone, 269
Continuous culture, for growth of *Streptomyces aureofaciens*, 233
Creosote-tolerant marine bacterium, *Pseudomonas creosotensis*, sp. n., 472
Cucumber fermentations, influence of sorbic acid on yeasts of, 139
Cucumber fruit and blossoms, influence of gamma radiation on microflora of, 145
Cucumber softening, pectolytic enzymes in, 121
Curing, of cacao beans, yeasts isolated during, 370

Decontaminator-washer-dryer-powderer for surgical gloves, 81
Degeneration of *Streptomyces niveus*, with repeated transfers, 342
Description of the streptomycetes, an evaluation of criteria and procedures for, 55
Detection of air-borne *Pasteurella tularensis*, use of fluorescent antibody technique for, 585
β-Diethylamino-α-hydroxypropionaldehyde, plaque suppression method for study of, 66
Disinfectant, general purpose, germicidal efficiency of, 497
Disinfectants, phenolic, factors affecting activity of, 562
Disinfection, of oral thermometers from a tuberculosis sanitorium, 508
Disinfection, techniques for, and effects on, rectal thermocouple catheters, 273
Domination among lactic streptococci, in antibiotic production, 200
Domiphen bromide, use of, as antifungal agent, 538

Egg injection, inexpensive, accurate "injection gun" for, 65
Electrophoretic properties of spores of *Aspergillus niger*, 113
Enrichment methods, for isolation of salmonellae from food samples, 484
Enterococci, detection of, in frozen sea foods, 295
Enterococci, media for enumerating, in frozen vegetables, 303
Enterococci, occurrence of, in bud, blossom, and soil, 541
Enterococci, tellurite and tetracycline resistance among, 391
*Escherichia coli*, detection of, in frozen sea foods, 171
*Escherichia coli*, production of L-threonine by, 419
*Escherichia coli*, survival in sea water, 400
*Escherichia coli*, thermal destruction of, in milk and milk products, 415
Ethylene oxide, antimicrobial activity of, 45
Ethylene oxide, reaction on plastics, 256

Fatty acids, long-chain, as antifungal agents, 538
Fatty acids, production of, in the rumen of cows, 554
Fecal indicator organisms, detection of, in frozen sea foods, 171, 295
Fecal streptococci, in surface waters, 15
Fermentation of *Aerobacter aerogenes*, in citrus wastes, 244
Fermentation of cacao, yeasts isolated during, 370
Fermentation, continuous culture method for studying rumen, 150
Fermentation, continuous, of novobiocin, 366
Fermentation media, use of β-propiolactone for sterilization of, 534
Fermentation, of miso, use of *Saccharomyces rouxii* pure culture for, 515
Fermentation, submerged acetic, laboratory method for, 425
Fermentation units, theoretical design for continuous antibiotic, 361
*Ferrobacillus ferroxidans*, in oxidation of pyritic materials in coal, 491
Filamentous growth of *Sphaerotilus natans*, factors affecting, 580
Filters, membrane, use in recovery of virus, 376
Fish, diseased, identification of causal organisms of, 587
Fluorescence, natural and induced, in microscopic organisms, 354
Fluorescence, production of, on packaged chicken, 549
Fluorescent antibody technique, for detection of air-borne *Pasteurella tularensis*, 585
Fluorescent antiserum, use in purity control production of baker's yeast, 469
9α-Fluorohydrocortisone, hydroxylation by *Streptomyces roseochromogenes*, 372
Formaldehyde, antimicrobial activity of, comparative procedure for evaluating, 45
Freeze-drying, in preservation of microorganisms, 256
Frozen foods, bacterial counts of, influence of subtle differences in plating procedures in prepared, 32
Frozen foods, standards and handling codes for, 452
Frozen meat pies, survival of bacteria in, 6
Frozen sea foods, detection and enumeration of fecal indicator organisms in, 171

*Gallionella*, occurrence in salt water, 380
General purpose military disinfectant, germicidal efficiency of, 497
Germicidal efficiency of general purpose military disinfectant, 497
Grape juice, yeasts in, stored at low temperature, 162

Heat sterilization operations, scale-up of, 134
Hospitals, in-use testing of bactericidal agents in, 167
16α-Hydroxy steroids, hydroxylation by *Streptomyces roseochromogenes*, 372

Induced fluorescence, in microscopic organisms, 354
Induced variation in the rhizobia, 410
"Injection gun," inexpensive and accurate, for egg injection, 65
Invertase production by yeasts, 291
Irradiated sucrose-nitrate medium, growth of *Aspergillus oryzae* in, 110
Irradiation, effect of, on *Aspergillus oryzae*, 10
Isolation of salmonellae from food samples, 484, 487
Isolation of *Sphaerotilus*, 219

Japan, microbiological science in, 434

α-Ketoadipic acid in yeast, biosynthesis of lysine from, 1

Laboratory aeration, theoretical basis for, 25
Lactic acid bacteria, formation of acidic carbonyl compounds by homofermentative, 184
Lactic starter cultures, stimulation of, by *Pseudomonas fluorescens*, 117
Lactic streptococci, domination among, in antibiotic production, 200
Lactose pre-enrichment method for isolation of *Salmonella* from dried egg albumen, 188
Lysine, biosynthesis of, from acids in yeast, 1
Lysine content of molds, 181
Lysine-iron agar, in detection of Arizona cultures, 478
Lysine-rich yeast, production of, 12

Mammalian cells, replication of variola virus in, 545
Marine bacterium, *Pseudomonas creosotensis*, sp. n., 472
Meat curing, microbiology of fermented sausages, 156, 229
Meat pies, survival of bacteria in frozen, 6
Meats, coagulase-positive staphylococci in, 228
Media, to determine coagulase-positive staphylococci in market meats, 228
Media, oxytetracycline formation in chemically defined, 36
Membrane filters, for recovery of virus from aqueous solutions, 376
Methionine content of molds, 181
Method for isolation of *Salmonella*, use in a survey of commercially produced albumen, 188
Methyl bromide, antimicrobial activity of, comparative procedure for evaluating, 45
Mice, effect of β-propiolactone on, 278
Microbiological science in Japan, 434
Microbiological standards and handling codes for chilled and frozen foods, 452
Microbiology of meat curing, of fermented sausages, 156, 23
Microflora, of chlortetracline-treated and nontreated poultry, public health aspects, 39
Microflora, of cucumber fruit and blossoms, influence of gamma radiation on, 145
Microflora within healthy tomatoes, 20
Milk, market, violet discoloration in, by spoilage bacterium, 287
Milk, thermal destruction of *Escherichia coli* in, 415
Miso, fermentation with *Saccharomyces rouxii*, 515
Molds, lysine, methionine, and tryptophan content of, 181
Mouse-derived cell cultures, effect of β-propiolactone on, 27
Mycelium, waste, in penicillin production as sole nitrogen source, 252
Myoglobin, role of bacteria in oxidation of, 529

Gisin, effect on canned food spoilage bacteria, 108
Nitrogen requirements of ruminal cellulolytic bacteria, 96
Nocardia, oxidation of alkyl-substituted cyclic hydrocarbons by, 383
Nonlogarithmic behavior, significance of, in testing thermal death data, 282
Nonsporing organisms, effect of sodium alginate on, 213
Novobiocin, continuous fermentation of, 366
Nutrition of the genus *Ruminococcus*, 91

*Ophryoscolex caudatus* Eberlein, in rumen, physiological studies of, 405
Organic acids, fungistatic effects of, in grape juice stored at low temperature, 162
Oxidation of myoglobin, role of bacteria in, 529
Oxygen, destructive action of, in freeze-drying, 256
Oxytetracycline, formation by *Streptomyces rimosus*, in chemically defined media, 502
Oxytetracycline-producing *Streptomyces rimosus*, new hybrid strain of, 349

*Pasteurella tularensis*, fluorescent antibody technique for detection of air-borne, 585
Pectolytic enzymes, in cucumber softening, 121
Pectolytic microorganisms isolated from cucumber softening, 128
*Pediococcus cerevisiae* starter culture for fermented sausage, 239
Penicillin, effect of, on feed-bloat of steers, 511
Penicillin production, comparative, with vegetative and spore inoculum of *Penicillium chrysogenum*, 85
Penicillin production with waste mycelium of *Penicillium chrysogenum* as sole source of nitrogen, 252
Performance assay, effect of paper, in the control of antibiotic sensitivity discs, 334
Phenolic disinfectants, factors affecting activity of, 562
Plants, occurrence of enterococci in, 541
Plaque suppression method for study of antiviral compounds, 66
Plating procedure, influence of subtle differences in, on bacterial counts of frozen foods, 32
Polysaccharides, purified, from *Rhizobium*, 519
Poultry, market, *Clostridium perfringens* isolated from, 337
Poultry, market, survey for *Salmonella* infection, 72
Pregnadiene, bioconversion to pregnatriene, by *Septomyxa affinis*, 346
Preservation of microorganisms by freeze-drying, 256
Procedure, comparative, for evaluating antimicrobial activity of gaseous agents, 45
Progesterone, bioconversion to 11α-hydroxyprogesterone, by *Rhizopus nigricans*, 346
β-Propiolactone, comparative effects of, on mice, mouse-derived cell cultures, and Venezuelan equine encephalomyelitis virus, 278
β-Propiolactone, in sterilization of fermentation media, 534
β-Propiolactone, sterilization of regenerated collagen sutures with, 269
Propionic acid, rate of production of, in rumen of lactating cows, 554
Protein hydrolyzate, ammonia produced from, by rumen bacteria, 175
*Pseudomonadaceae*, in microflora of healthy tomatoes, 20
*Pseudomonas creosotensis*, sp. n., creosote-tolerant marine bacterium, 472
*Pseudomonas fluorescens*, identification of, in diseased fish, 587
*Pseudomonas fluorescens*, stimulation of lactic starter cultures by filtrates from milk cultures of, 117
Psicofuranine, plaque suppression method for study of, 66
Public health aspects of comparative microflora of chlortetracycline-treated and nontreated poultry, 39
Purity control, in production of baker's yeast, 469
Pyrite, bacterial oxidation of, in coal, 491

Quarternary ammonium compounds, mixed with long-chain fatty acids, use as antifungal agents, 538

Radiation, gamma, influence on microflora of cucumber fruit and blossoms, 145
Raw milk, coagulase-positive staphylococci from, 195
Rectal thermocouple catheters, disinfection techniques for, 273
Relative humidity, effect on survival of *Serratia marcescens*, 567
Rhizobia, induced variation in the, 410
*Rhizobium*, preparation of purified polysaccharides from, 519
Rifomycin B, production of, 325
Rifomycin complex, fermentation and production of, 320
Rumen bacteria which produce ammonia from protein hydrolyzate, 175
Rumen fermentation, continuous culture method for studying, 150
Rumen, flora and fauna of, in steers fed bloat-provoking ration, 511
Rumen, of lactating cows, rates of production of volatile fatty acids in, 554
Rumen, physiological studies of protozoan *Ophryoscolex caudatus* Eberlein in, 405
Rumen, properties of slime from, 209
Ruminal cellulolytic bacteria, nitrogen requirements of, 96
*Ruminococcus* genus, nutritional requirements of, 91

*Saccharomyces*, acetaldehyde formation in submerged cultures of non-film-forming species of, 316
*Saccharomyces cerevisiae*, production of extracellular and total invertase by, 291
*Saccharomyces rouxii*, pure culture fermentation of miso with, 515
*Salmonella*, enumeration of, 487
*Salmonella* infection, survey of market poultry for, 72
*Salmonella*, isolation of, from dried egg albumen, lactose preenrichment method for, 188
*Salmonella typhimurium*, comparison of media and methods for recovering from turkeys, 76
Salmonellae, antibiotic-resistant, isolated in 1959 and 1960, 389
Salmonellae, isolation from food samples, 484, 487
Salmonellae, thermal death time, in foods, 308
Salt water, occurrence of *Gallionella* in, 380
Sanitizing properties of Armazide, 572
Sausage, manufacture of dry, 480
Sea foods, detection of fecal indicator organisms in frozen, 171, 295
Sea water, heat- and filter-sterilized, in survival of *Escherichia coli*, 400
*Serratia marcescens*, survival of, relative humidity effect on, 567
Slime, from rumen, chemical and physical properties of, 209
Slit sampler for collecting T-3 bacteriophage and Venezuelan equine encephalomyelitis virus, 103, 106
Sodium alginate, effect of, on nonsporing organisms, 213
Soil, occurrence of enterococci in, 541
Sorbic acid, influence on yeasts of cucumber fermentations, 139
*Sphaerotilus*, isolation and preservation of, 219
*Sphaerotilus natans*, filamentous growth of, factors affecting, 580
Spore inoculum of *Penicillium chrysogenum*, penicillin production with, 85
Spores, electrophoretic properties of, 113

Standards and handling codes for chilled and frozen foods, 452
Staphylococci, coagulase-positive, from raw milk, 195
Staphylococci, thermal death time, in foods, 308
*Staphylococcus aureus*, effect of sodium alginate on, 213
*Staphylococcus*, bacteriophage-lysing strain, used in manufacture of dry sausage, 480
Sterilization, ethylene oxide, reaction on plastics, 256
Sterilization, heat, scale-up of operations, 134
Sterilization, fermentation media, use of β-propiolactone for, 534
Sterilization, regenerated collagen sutures with β-propiolactone, 269
Steroids, continuous microbiological transformations of, 346
Streptococci, fecal, in surface waters, 15
Streptococci, lactic, domination among strains of, in antibiotic production, 200
*Streptomyces aureofaciens*, growth of, in continuous culture, 233
*Streptomyces mediterranei*, production of rifomycin by, 320, 325
*Streptomyces niveus*, degeneration of, with repeated transfers, 342
*Streptomyces rimosus*, new hybrid strain of, 349
*Streptomyces rimosus*, oxytetracycline formation by, 502
*Streptomyces roseochromogenes*, 16α-hydroxylation by, 372
*Streptomyces*, various actinomycins produced by, 263
Streptomycetes, evaluation of criteria and procedures used in the description and characterization of, 55
Submerged acetic fermentation, laboratory method for, 425
Sucrose-nitrate medium, irradiated, growth of *Aspergillus oryzae* in, 110
Surface waters, cultivation and enumeration of fecal streptococci in, 15
Surgical gloves, a decontaminator-washer-dryer-powderer for, 81

Tellurite resistance, among enterococci, 391
Tetracycline resistance, among enterococci, 391
Tetracycline-resistant salmonellae, isolated in 1959 and 1960, 389
Thermal death data, testing for significant nonlogarithm behavior, 282
Thermal death time studies on salmonellae and staphyloco in foods, 308
Thermometers, clinical, disinfection of, 508
Thermophilic actinomycetes, cultivation of, 394
L-Threonine, production of, by *Escherichia coli*, 419
Tomatoes, microflora within healthy, 20
Tracers, physical, for bacterial aerosols, 248
Tryptophan content of molds, 181
Turkeys, comparison of media and methods for recoveri *Salmonella typhimurium* from, 76
Tylosin, effect on canned food spoilage bacteria, 108

Variola virus, replication of, in suspended mammalian c cultures, 545
Vegetables, media for enumerating enterococci in frozen, 3
Vegetative and spore inoculum of *Penicillium chrysogenu* penicillin production with, 85
Venezuelan equine encephalomyelitis virus, effect of β-prop lactone on, 278
Venezuelan equine encephalomyelitis virus, slit sampler collecting, 106
Violet pigment-producing spoilage bacterium of refrigerat market milk and cream, 287
Virus, recovery from aqueous solutions, membrane filters 376
Virus, variola, replication of, in mammalian cells, 545

Water, slime, isolation of *Sphaerotilus* from, 219

Yeast, baker's, use of fluorescent antiserum in purity cont of production of, 469
Yeast, biosynthesis of lysine from acids in, 1
Yeast, lysine-rich, production of, 12
Yeasts, in cucumber fermentations, influence of sorbic acid 139
Yeasts, growth of, in grape juice stored at low temperature,
Yeasts, production of chlorogenicase by, 205
